VFS S2 SERIES

Enhance Your Game

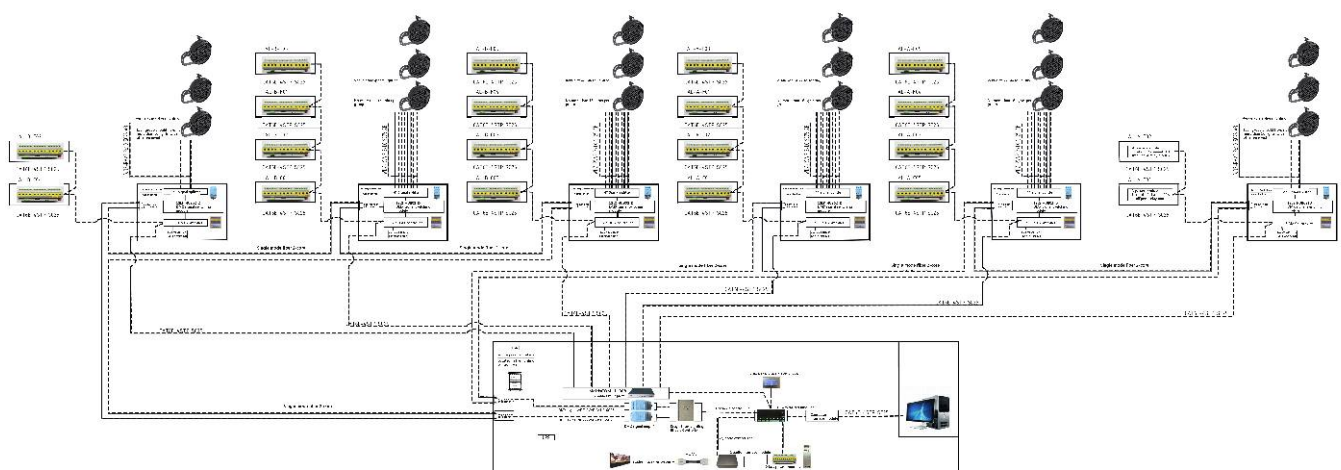

- VFS S2 SERIES Experience of glare control in professional sports lighting
- A professional sports lighting efficient operation and convenient operation lighting system that can adapt to the lighting requirements of various competition venues
- Perfect glare solutions effectively controlling direct and indirect glare

- The perfect glare solutions effectively controls direct and indirect glare with efficient light distribution processing, which can accurately project the light beam into the effective illumination area and improve light utilization efficiency.
- Good to players, coaches, referees, sponsors HoTywith an experienced lighting design

CONTROL SYSTEM

Intelligent Sports Lighting Control System Diagram

We design control system for different venues. For large venues or venues with commercial sports events, we will provide compatible solutions. This includes professional sports lighting design and light shows, which unify may combine the the display screen, speaker system, lighting system, and even stage lighting system in the venue to fully present commercial sports events.

PRODUCT DESIGN

Aiming device

Accurate positioning of the optimal installation angle convenient to use.

Air flow structure

Excellent heat dissipation structure and dynamic thermal management design can maximize heat dissipation greatly improving the lifespan of the lighting fixtures.

Mounting bracket

Multi angle and convenient maintain bracket, with comprehensive functions and high safety performance in practical applications.

Control Visor

Minimize the spill light to reduce the light pollution

Light source

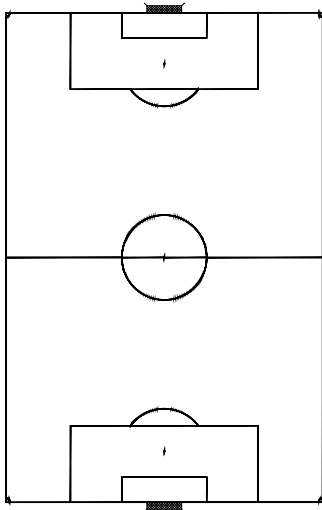

The high CRI and high efficiency LED design can adapt to the needs of various competitions, training, and HDTV broadcasting.

Anti glare device

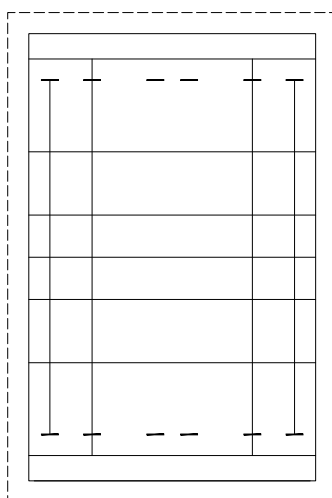

The anti glare device can minimize the glare effect of lighting fixtures and minimize the loss of light output.

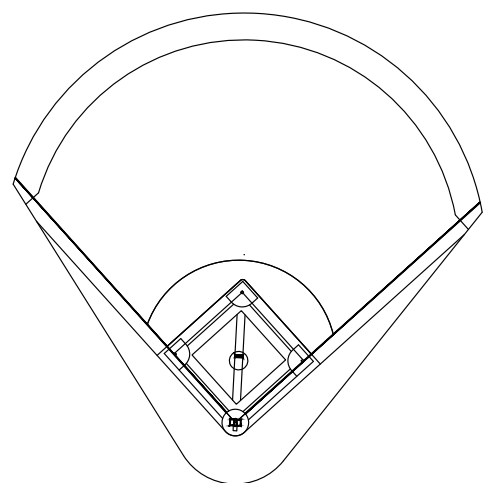

Professional solutions for
sports stadiums and gymnasiums

Soccer Field
